

DON'T MISS IT!

THE WEINIG TECHNOLOGY EXPO

April 6 & 7, 2017

Design trends driving the commercial and residential markets continue to favor wood-based materials, including cabinetry, flooring, furniture and decor.

Your business will continue to feel the pressure of delivering diverse, customized projects in record-time to meet demanding customer expectations. You need to keep ahead of the game, relying on versatile machinery systems and innovative technology. The Weinig and Holz-Her Tech Expo will demonstrate how our solutions help you meet today's challenges.

Featuring live demonstrations on over 30 machines in our 25,000 sq. ft. showroom, both solid-wood and panel processing solutions are exhibited. Speak with our product experts to understand the choices available to solve your greatest challenges for both short term and future needs. It's time to make plans. It's time to **THINK WEINIG.**

HIGHLIGHTS

Powermat P700 Eagle

- German engineering, entry-level pricing
- 1-1/2" spindle diameter
- 7,000 RPM spindle speed
- CNC positioning with software setting aids
- 100% WEINIG quality

2016 Challenger Award Winner!

Lumina equipped with LTronic & GluJet

- Lumina series edgebanders equipped with two systems for perfectly invisible joints
- GluJet—waterproof with thin film technology, with no expensive PUR additional glue system
- LTronic—invisible joints using NIR infrared technology with no heat-up time and noiseless processing
- quickly change between the two systems in just 3 minutes using high precision HSK interface

Expo Details

When

Thursday & Friday,
April 6 & 7, 2017
8:30 am - 5:00 pm

Where

124 Crosslake Park Dr.
Mooresville, NC 28117

Contact

- Ripping
- Moulding
- Cross-Cutting
- Scanning
- Finger-Jointing
- Automation
- Cutting
- Edgebanding
- Material Handling
- CNC Machinery
- Sanding
- Optimizing

See new ideas to help your company be more competitive with today's demands for short lead times and smaller run quantities.

Get the latest information in:

- Quick set-up Powermat moulders
- Moving blade rip saws with smart ValuRip infeed systems
- The most advanced cross-cut saws on the market today
- High speed scanning for both ripping and cross cutting
- Comprehensive product portfolio for finger jointing

See our solid-wood technology in action:

- Oscillating spindle moulders for producing textured surfaces
- Complete lineal moulding cell
- Cabinet door cell with complete 5-piece production
- State-of-the-art scanning systems
- Jointing technology

And even more panel processing technology

- Automated material handling systems to reduce labor and increase efficiency
- New edgebander technology with servo automation
- PUR adhesives and new glue delivery systems
- Wide belt sanding technology for lacquer/sealer, veneer, and solid wood sanding

See our panel processing technology in action

- Automated manufacturing cell
- Servo-automated edgebanders
- Advanced wide belt sanders
- Complete cabinet door manufacturing cell

Nobody in the industry can put **ALL** facets of solid wood and panel processing together with the expertise and know-how of WEINIG and HOLZHER.

Come by and let us show you how.
