

# Safety Labeling

Safety labels and decals properly installed on equipment is one of the most effective means of protecting your personnel.

In addition to the replacement safety labels offered free of charge for all your machinery from the Weinig Group, we fully support all industry efforts to coordinate the safety labeling of all woodworking equipment.

An excellent cooperative effort sponsored by the Wood Machinery Importers Association in collaboration with Clarion Safety Systems (formerly Hazard Communication Systems) to make this powerful resource available to all manufacturers and users.

Weinig encourages you to contact Clarion for a large array of safety labeling products that may help you to improve safety levels for all types of machinery in addition to equipment from the Weinig Group.
